

Give Your Crane A Lift

Helping you get the job done safely
efficiently and on time.

R2420 - Range Limiting Device

At the forefront of technology, the R2420, a programmable Range Limiting Device, warns the operator when the boom approaches obstacles. Thanks to a new user-friendly system, it guides the operator by sending interactive messages.

Applications :

- For excavators and lattice cranes

Features and Benefits

- User-friendly, LCD display;
- Possibility to program a limit on the angle and/or the slewing;
- Permanent autoverification : Alarm and lock out capability if a failure occurs;
- Customizable and automatically calculated warning zone within a limit;
- Visual and audible alarms release as soon as the limits are crossed;
- Provides a mean to avoid contact with obstacles.

Technical Data

Dimensions :	67/8" X 31/4" X 21/4"
Sensors :	Ratiometric type
Supply voltage :	12-24v DC
Temperature :	-30° C to 40° C
Display sealing :	IP 64
Display format :	16 characters x 2 lines
